

HS STEEL GROUP proudly announces that Dutch teak specialists **MARRON YACHTBUILDERS & ECODECK** are now part of the HS Steel Group, which also includes the Werkvreugde organization from Oss/ Echten, the Netherlands.

Marron Yachtbuilders also attaches great importance to craftsmanship and passion when designing, producing and assembling prefab teak decks and other high-quality products. In addition, Marron Jachtbouw produces and installs prefab exterior ceilings at the highest level. This fits in seamlessly with the services provided by Werkvreugde, which designs and manufactures the best possible quality stainless steel products for superyacht building. Sharing the knowledge and joining forces, operating together in the superyacht building industry, makes this combination even more powerful.

ECODECK; thé sustainable alternative to teak

An important product of Marron Jachtbouw is the self-developed M-EcoDeck, which has a great future in superyacht building. Because of the known scarcity of teak, this is a very nice recyclable and sustainable alternative with the right high-end appearance. M-EcoDeck is widely applicable in all designs, in various colors and plank widths, also as for example caprail, stair treads, skirting boards and exclusive wall panels.
